

This is in response to the fcc's proposal to create lpfm stations. I am concerned that my radio station k-love, 91.1 here in denver will be turned into a lpfm station and not left as is, as a FM station. I support this station and want it to remain as is forever.

This station is very important to me and others of christian faith.

It is doing a greater good for our community and our world. I do not want to lose this station. It plays well as a FM station. I listen to it 24/7. I do not want these lpfm stations to take over for our FM station, any FM station, for that matter. I want this stations to remain as is, no advertising and just christian music.

I believe that this station provides our community with a service that can not be gotten any where else. The service that k-love provides is in the best interest of the public. I do not want our FM signal replace by any lpfm, I like the family oriented material that k-love has. I don't feel that these lpfm stations would have our interest at heart. thank you
